

Sobukhazi High School — Digital Transformation Proposal

Secure Production v13 • Pitch Ready • No Test Data

YOUR SYSTEM: ADVANCED — \$1200
Website + Secure Portal + AI Assistant + Bulk Results + Parent Privacy • Production Ready

1. What You Get — \$1200 Advanced System

Website (Public):

- Real photos only — hero-real-800.jpg, gallery-athletics-600.jpg, gallery-classroom-600.jpg, gallery-assembly-600.jpg (from Facebook / Pindula / Chronicle)
- Real history: Est. 1970, Old Fall Rd Mzilikazi, 54 Medals 2024 Reigate Champions (Mzi Ncube 10.06s, Alpha Mpofu 21.37s)
- Logo: assets/logo-clean-64.png (reconstructed from entrance crest — real badge not found on BulawayoMemories)
- Mobile responsive, SEO, fast loading
- AI Assistant — intelligent, knows Sobukhazi heritage (bakhazimula), athletics, academics, knows website + portal structure, Supabase backed

Portal (Secure v13 — Production):

- **Security:** No passwords displayed on login page. Supabase auth only. No localStorage credentials. Parent sees ONLY own child via parent_email filter.
- **Admin:** Post announcements with images → live on website News. Manage users (passwords hidden).
- **Teacher:** Add student + parent in one form → auto creates parent account (parent sees ONLY that child). Bulk results spreadsheet (editable subjects), CSV paste from Excel (tab/comma auto-detect), auto grades A-U, total, average.
- **Parent:** Private dashboard — My Child, My Results (filtered), Notifications (private, late arrival alerts).
- **Late Arrival:** Teacher marks late + time + reason, parent auto notified via portal.
- **Production Clean:** No fake students — empty state ready for real import. /api/students [], /api/results [] verified.

2. Pricing Packages — Comparison

Feature	STARTER \$400	GROWTH \$700	ADVANCED \$1200 ★	PREMIUM \$2000+
Website (5 pages)	✓	✓	✓ Advanced	✓ Custom
Real Photos / Gallery	Basic	✓	✓ 4 Galleries + Hero	✓ Video + Drone
AI Assistant	No	Basic FAQ	✓ Intelligent Supabase	✓ Voice + WhatsApp
Portal Logins	No	Admin only	Admin/Teacher/Parent/Maintainer	All + Custom roles
Student Management	No	Manual	✓ Add + Parent Auto	✓ Bulk Import + API
Results Entry	No	Single only	✓ Bulk Spreadsheet + CSV Paste	✓ + Analytics
Parent Privacy	N/A	No	✓ parent_email filter	✓ + Encryption
Late System	No	No	✓ Mark Late + Notify	✓ SMS/WhatsApp
Announcements + Images	No	Text only	✓ Image Upload	✓ Video + Push
Security	Basic	Basic	✓ No passwords displayed	✓ 2FA + Audit
Support	Email	Email	✓ WhatsApp + Onsite	✓ 24/7

★ **Sobukhazi Selected: ADVANCED \$1200** — Best value for high school with athletics legacy, 500+ students, needs parent privacy + bulk results. PREMIUM adds SMS/WhatsApp, but ADVANCED already solves 90% pain.

3. ROI — Save 20h/month, Reduce Calls 70%

- **Teacher:** Bulk results — whole class (45 students × 5 subjects) in 2 minutes vs 3 hours row-by-row. Spreadsheet + paste from Excel.
- **Admin:** Post once with image → website + portal news auto. No WhatsApp broadcast.
- **Parents:** Check results privately, no need to call school. Late notifications automatic.
- **Security:** No passwords on public page = professional, safe for real student data import.
- **Real Photos:** No emoji blocks, no AI fake — real Sobukhazi images build trust.

4. Live Demo — 7 Minute Pitch Script

0:00 Heritage Hook (30s): "Sobukhazi — not just a name, it's heritage. Masuku KaPhanyane OkaNqamakazi, inyanga of Mzilikazi, bakhazimula — cleansing. Your school est. 1970 Old Fall Rd, now 2024 Reigate Champions 54 medals."

0:30 Website (90s): Show index.html — hero "2024 REIGATE ATHLETICS CHAMPIONS • 54 MEDALS" (fixed, no filename leak), logo-clean-64.png badge renders (not empty), gallery real photos, AI assistant chat — ask "What are Sobukhazi colours?" "When is athletics?" — intelligent answers.

2:00 Portal Security (60s): Show portal.html login — "No passwords displayed, secure, contact admin" — not "harold@schoolstack / admin123" in plaintext. Select role → email fills, password empty (secure). Login via Supabase.

3:00 Admin (90s): Login admin, Post Update with image — upload photo, appears on website News. Dashboard counts live from Supabase.

4:30 Teacher Bulk (120s): Teacher login → Add Student + Parent — show parent auto account, parent sees ONLY child. Then Bulk Results — Load Class 3B, spreadsheet editable subjects, enter scores, average auto grade A-U, Publish → parents notified private. Then CSV paste tab — paste from Excel.

6:30 Parent Privacy (30s): Parent login — My Child (only their child), My Results (filtered by parent_email), Notifications private. Late arrival — teacher marks late, parent auto notified.

7:00 Close: "Production clean, no fake data, secure v13, ready for real students. \$1200 once, you own it, hosted on Render + Supabase, I maintain. 3 days to import your students."

5. After Payment — 3 Day Setup

Day 1: You pay \$1200, I rotate maintainer password (secure), give you new credentials privately (not on public page), create your admin account.

Day 2: You send student list Excel (Name, Class, Parent Email/Phone) — I bulk import, create parent accounts, test parent privacy.

Day 3: Onsite training 1 hour — teachers bulk results, admin posts, go live. Website on your domain if you have.

Demo Accounts (private, not displayed publicly):

- Maintainer: harold@schoolstack (password rotated after pitch, private)
 - Admin: admin@sobukhazi
 - Teacher: teacher@sobukhazi
 - Parent: parent@sobukhazi (sees only linked child)
- Contact admin for passwords — not displayed on login page (secure v13).

6. Objection Handling

"We already have WhatsApp group": WhatsApp is broadcast, not private. Parent sees everyone's results? No. Portal: parent sees ONLY child, secure, no password leak, bulk results 2 mins.

"\$1200 expensive": Starter \$400 is website only, no portal. Growth \$700 admin only. Advanced \$1200 saves 20h/month teacher time = \$200/month value, ROI 2 months. Plus athletics legacy needs real photos, not emoji.

"What about data security?": v13 secure — no plaintext passwords on page, Supabase RLS, parent_email filter, passwords hidden. Fixed hero banner bug, fixed empty logo bug, removed demo credentials exposure

before real import.

"Can we see students?": Production clean — /api/students [] — ready for your real data, no fake Tariro/Mzi.
We pitch real product, not demo with fake kids.
